Professional Summary

Full Stack Software Engineer with 2+ years of hands-on experience building scalable and secure MERN stack applications for remote clients. Skilled in designing RESTful APIs, implementing JWT-based authentication, and developing performance-optimized React applications. Experienced in delivering complete project lifecycles from development to deployment while following clean architecture and best coding practices. Strong remote collaboration skills and committed to building production-ready solutions.

Technical Skills

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DaisyUI, React Router
- Backend: Node.js, Express.js
- Database: MongoDB
- Authentication & APIs: REST API Development, JWT Authentication, Role-Based Access Control
- Deployment: Vercel, Netlify, Render
- Version Control: Git, GitHub
- Collaboration Tools: Slack, Trello, Notion

Work Experience

Full Stack Software Engineer (Remote) | Independent Software Contractor | Jan 2023 – Present

- Built 8+ production-ready MERN stack applications for international remote clients.
- Designed and developed secure RESTful APIs handling authentication and CRUD operations.
- Implemented JWT-based authentication with role-based access control systems.
- Optimized frontend performance, reducing load time by up to 30%.
- Managed full project lifecycle from requirement analysis to deployment.
- Collaborated with clients remotely using Slack, Trello, and Git-based workflows.

Selected Projects

- **E-Commerce Web Application (MERN Stack)**
Developed full-stack e-commerce platform with authentication, admin dashboard, and product management system.
- **Task Management Application**
Built secure task management system with full CRUD operations and protected routes.
- **Portfolio & Client Business Websites**
Designed and deployed responsive business websites with optimized UI/UX using React and Tailwind CSS.
